

## WALKABLE PV FLOOR NEW CONSTRUCTION

In the vibrant streets of San Francisco, Apple store exemplifies a blend of **cutting-edge technology** and **environmental consciousness**, a hallmark of Apple's brand philosophy. A particularly noteworthy feature of this store is its innovative **photovoltaic (PV) walkable floor installed on the rooftop**, a clear indicator of Apple's commitment to innovation, sustainability and renewable energy.

Thanks to the design of **Foster+ Partners**, **Apple** has been able to implement this walkable roof that also generates electricity, padding the way to a clean and sustainable future.

Onyx Solar supplied approx. 6,000 SqFt of crystalline Silicon PV glass, featuring a **textured, anti-slip finish and a black color ceramic frit for maximum opacity**. Each PV glass panel is about 10' x 5', and it was installed by renowned Seele.

FROM "THINK DIFFERENT" TO "ACT DIFFERENT".
