

PHOTOVOLTAIC FAÇADE

NEW CONSTRUCTION

Culver City Creative, also known as C3, is an award-winning creative office building that hosts Onyx Solar's **first-of-its-kind photovoltaic curtain wall** project developed in the United States.

The development emphasizes volume and flexibility with a highly customizable modern design by **Gensler**, the largest architectural firm in the world.

C3 offers unique creative office space to be inspired, be inventive, and most importantly, be original.

With **unobstructed views** C3 has been designed to ideally fit tenants looking for a collaborative, high-energy campus environment.

C3 integrates a PV curtain wall by comprised of 24 different sizes of amorphous silicon PV glass panels that generates energy and filter harmful radiation and heat to maximize the comfort inside.

TECHNICAL DATA

Nominal Power (Wp/m ²)	40 Wp/m ²
Visible Light Transmittance (VLT)	10%
Solar Factor (g-value)	10%
U value (W/m ² K)	1.60
U value (Btu/h ft ² °F)	0,28
Light Reflection (external)	8%
